2. Course description

This course is an introduction to the theory, methods, and central concerns of sociolinguistics, the study of the relationship between language and society. Our focus will be on the social correlates of language variation and change. By reading and discussing classic and contemporary papers in the field, we will address a number of fundamental questions about how language varies and changes: across speaker groups, within individuals, and over time. Emphasis will be placed on exposing students to topics of current interest and active debate in sociolinguistic research, with the aim of preparing students to contribute to the field.

The readings and discussions in this course will assume some prior exposure to linguistics. Students without this background are welcome to enroll, and will be offered supplementary reading to catch up.

3. Learning objectives

Through successfully completing this course, students will

- become familiar with social correlates of variation and change in language.
- gain broad exposure to the theories, frameworks and methods in the field of sociolinguistics, including: dialectology, language contact, multilingualism, speech community, communities of practice, register, style, inter and intra-speaker variation, identity, ethnography, data collection, cognitive and internal constraints, statistical methods, fine-grained variationist analysis.
- collect, analyze, and write about sociolinguistic data.
- be able to discuss matters of sociolinguistic variation with scientific rigor and cultural sensitivity.
- be able to develop research questions of interest to sociolinguistic theory and contribute original research to the field.

4. Course materials

Everything you will need for the course will be linked from this syllabus document. I recommend that you make a shortcut to this document on your own Google Drive by doing File > Add shortcut to Drive. Then organize it somewhere where you can easily find it each time we meet.

Access to course materials is restricted to NYU Google accounts. If you're told that you "do not have permission" to access some course material, you are likely logged in through a personal Google account. Switch to your NYU account and try again.

5. Requirements

- **Readings, annotations, and participation (20%).** All participants are expected to do the assigned reading (before class) and to participate in discussion of the material in class. You are also expected to annotate the readings with questions/comments/complaints as you read them — at least one annotation per class session. **These annotations must be posted at least 24 hrs before class begins** (so, by Tuesday morning). *Note: In the week when you are responsible for presenting an article (see below), you are off the hook for leaving annotations! But please do still read the other paper(s) for that week.*

We will attempt to use Adobe's Share PDF feature for annotating readings. On a desktop, it doesn't require any special software or logging in (though please identify yourself when you comment). On a mobile device, you'll need the (free) Adobe Acrobat app, and you'll need to log in with your NYU/Google account to comment. **Please access the readings through the syllabus links in this document** so that you access the commenting interface.

- **Article presentation/discussion leading (20%).** The papers marked on the syllabus with an asterisk (*) are available for student presentation/discussion leading. Each student will select and lead discussion of one of these papers. Discussion leaders should prepare a handout (digital is fine) with summary points and discussion questions. Discussion leaders should also incorporate their classmates' comments and questions into their presentation. As the discussion leader, your job will be to summarize and contextualize the article; to critically evaluate the authors' claims and evidence; and to facilitate discussion by posing questions, identifying avenues of further research, and addressing your classmates' annotations. Aim to take up 45 min. – 1 hour.
- **Assignments (60%).** Three assignments will be due throughout the semester, as follows:
 - Assignment 1: Sociolinguistic interview and report, due Fri. Feb. 6
 - Assignment 2: Quantitative study of a sociolinguistic variable, due Fri. Mar. 27
 - **Mandatory:** A short meeting with Laurel outside of class to get your topic approved, sometime before Fri. Feb. 27.
 - Assignment 3: Term paper, due Fri. May 1
 - **Mandatory:** A short meeting with Laurel outside of class to get your topic approved, sometime before Fri. Apr. 17.

6. Schedule

Week	Class topics and readings
1 1/21	<p>Introduction: Perspectives and approaches to the study of language in society</p> <p>For students with no prior background in linguistics: Perlin 2024 ch. 4, Wolfram & Schilling 2016 §3.3–3.4 (<i>Note that the examples in Wolfram & Schilling are specific to English, but the general concepts pertain to all languages.</i>)</p> <p>All students: Weinreich, Labov, & Herzog 1968 §0, §3.4–3.5; Fruehwald 2022 §27.1–§27.2; Eckert 2012; Fishman 1972; Gumperz 1981</p> <p>Optional, for students with interests in phonology: The rest of Fruehwald 2022</p> <p>Optional, for students with interests in syntax: Adger et al. to appear (not as long as it looks!)</p>
2 1/28	<p>Sociolinguistic methodology: Data collection, research ethics, data analysis</p> <p>Tagliamonte 2006 ch. 1–4 Bayley 2013</p>
